

The **NEW MASTER MK2 IS THE ULTIMATE CARTONI FLUID HEAD** designed most

specifically for HD applications, Film, ENG & EFP camera systems.

The **MK2** counterbalances very light cameras **from 3 Kg (6.6 lbs)** all the way to 30 Kg (66 lbs) making the **MK2** suitable from the smallest HDV camera to fully loaded RED, Alexa, F65, C300 (etc) cameras with all of the trimmings.

This new **CARTONI** counterbalance system is an evolution of the patented **CARTONI "Wing" system** and allows a perfect performance throughout the +/- 90° tilt range, with perfect stops at any angle.

The frictionless variable fluid modules perform a wide variety of fluid drag for the best smooth and precise movement in any shooting situation.

All operating knobs and levers are conveniently located and easy to reach with a special care for user-friendly ergonomics.

The **MASTER MK2** comes equipped with two telescopic pan bars, standard quick release sliding camera plate, (Eurostyle plate optional) illuminated spirit level and digital readouts for drag and counterbalance settings.

The **MK2** has a flat Mitchell standard base and an available 150mm bowl converter make the **MK2** suitable for all leg options and dollies.
